

Pure Water Made Simple

Personal Purification Device (PPD)

The Sulis PPD™ device provides the individual with quality drinking water from almost any groundwater source. It is a compact, lightweight, simple to operate and cost efficient device even a child can use. Durable and self contained, the Sulis PPD™ device fits onto most standard bottles, water taps and tanks.

The Sulis PPD™ device treats Organic, Biological and Chemical water contaminants and is designed to function in harsh environments. It has been developed to address specific Humanitarian sector needs, as well as offering a unique solution for emergency preparedness response, military operations, global travel and other commercial uses.

The Benefits of Sulis™ PPD:

- Treats most ground and fresh water sources
- Simple and easy to use - by children and all ages
- Fits most standard bottle tops and water taps
- Compact (7 cm) and lightweight
- Weight 100gr
- Durable even in harsh environments
- Self contained device
- Long shelf and service life
- No power source required
- Affordable purchase cost and extremely low cost per litre
